

National Gypsum Company
2001 Rexford Road
Charlotte, NC 28211

To National Gypsum Customers:

National Gypsum Company wallboard plants operate exclusively in the United States. These plants make a wide range of products including 1/2-inch and 5/8-inch wallboard, XP Gypsum Board which is mold resistant, fire-shield wallboard, shaftliner, and high-strength ceiling board.

We are aware of the publicized reports of problems with Chinese-produced wallboard in Florida. National Gypsum wallboard does not exhibit the characteristics exhibited in the Chinese wallboard. Our company has never imported, rebranded, or distributed wallboard made in China.

National Gypsum has produced wallboard in Florida for over 50 years with no problems of this nature. Since 2001, our company has produced approximately 9 billion square feet of wallboard in Florida, again with no problems.

Thank you for your interest in National Gypsum and its products.

Sincerely,

A handwritten signature in black ink that reads "Nancy Spurlock". The signature is written in a cursive, flowing style.
